

# STORM-PRO

## STORM-PRO: Revolutionizing Offshore Cargo Handling

Introducing STORM-PRO, an innovative cargo container designed to tackle the challenges of open water cargo handling in diverse offshore environments. Crafted with cutting-edge technology, STORM-PRO offers lightweight construction coupled with soft-touch features to safeguard your assets against impact, ensuring optimal protection during transit

**Why STORM-PRO?** STORM-PRO is engineered to redefine cargo handling efficiency in offshore operations. Here's why it stands out:

- **Lightweight yet Robust:** Constructed using modern high-strength composite materials, STORM-PRO boasts exceptional durability while remaining lightweight, optimizing vessel transit speeds and fuel/power efficiency.
- **Soft Touch Features:** Equipped with elastomeric elements, STORM-PRO absorbs impact energy, providing unparalleled protection for your assets in the event of collision.
- **High-Ratio Payload:** With a high payload ratio, STORM-PRO enhances vessel transit speeds, ensuring swift and efficient cargo transportation.
- **Simple Maintenance:** STORM-PRO features easily replaceable components and streamlined maintenance procedures, minimizing downtime and ensuring continuous operational efficiency.
- **Long Product Lifespan:** Built to withstand the rigors of offshore environments, STORM-PRO offers a long product lifespan, delivering enduring value to your operations.
- **Modular Design:** The modular design of STORM-PRO allows for customization, ensuring that the container is tailored to meet your specific requirements effectively.

**The Wave-4 Story:** In 2019, Reflex Marine received a grant from the Marine-i Challenge Fund, accelerating the development of the STORM-PRO cargo container. Leveraging our expertise in meeting industry challenges, we launched STORM-PRO in 2020 after extensive design modifications and testing. Now, we're expanding our product line to cater to diverse offshore industry needs, welcoming feedback from industry leaders to further enhance our offerings.

**Configurations and Sizes:** The modular design of STORM-PRO enables customization according to various sizes and capacities. Contact our sales team to explore configurations and request a quotation tailored to your requirements.

Experience the future of offshore cargo handling with STORM-PRO. Contact us today to learn more about our innovative solutions.
