

HEED 3 - 200 Series

HEED 3, which stands for "Helicopter Emergency Egress Device," is a compact, lightweight, and highly portable emergency breathing apparatus designed to provide essential respiratory support during critical situations, particularly in underwater environments.

- Flexible braided hose increases the versatility of HEED 3
- Refillable from an air compressor (or SCUBA tank using optional adapter)
- Deluxe Dial Gauge Pressure Indicator standard on every unit
- Sewn hose pouch protects the hose and keeps the system compact and out of way, but allows quick access
- Can be equipped with optional Nose Clip on a Lanyard

Specifications

Cylinder Capacity	2 cu ft / 58 litres
Service Pressure	3000 psi / 207 bar

Length	9.75" / 25cm
Diameter	2.25" / 5.7cm
Weight	1.99 lb. / 0.9 kg
Cylinder Material	Aluminum - Black Anodized
Regulator Type	Piston, downstream demand valve, 20" or 27" flexible braided hose
Pressure Relief	Integrated in regulator
Operational Temperature	-22°F / -30°C < +158°F / +70°C
Duration of Air	38 breaths*

***based on 1.5 liters per breath**
