

HEED 3 - 175 Series

HEED 3, which stands for "Helicopter Emergency Egress Device," is a compact, lightweight, and highly portable emergency breathing apparatus designed to provide essential respiratory support during critical situations, particularly in underwater environments.

- More than 1lb lighter than competing models
- Under 9.5" tall, the HEED 3 is the smallest emergency breathing device on the market
- Affordable - the HEED 3 is over \$100 less than competitors models
- Simple design is easy to repair and maintain
- Always-on design is ready to deliver air when you need it
- Refillable from an air compressor (or SCUBA tank using optional adapter)
- Deluxe Dial Gauge Pressure Indicator standard on every unit

- CE approved - Tanks on units shipped to Europe are CE approved to meet current European Safety Standards required for all compressed gas cylinders and are properly CE marked
- Made in the USA
- Can be equipped with optional Nose Clip on a Lanyard

Specifications

Cylinder Capacity	2 cu ft / 58 litres
Service Pressure	3000 psi / 207 bar
Length	9.5" / 24cm
Diameter	2.25" / 5.7cm
Weight	1.5 lb. / 0.7 kg
Cylinder Material	Aluminum - Black Anodized
Regulator Type	Single Stage
Pressure Relief	Integrated in regulator
Operational Temperature	-22°F / -30°C < +158°F / +70°C
Duration of Air	38 breaths*

***based on 1.5 liters per breath**
