

8mm Buoyant Lifeline - 30M

Equip your small vessel with the essential 8mm Buoyant Lifeline, a crucial component mandated by regulations for lifebuoy attachment. Designed for reliability and ease of use, this lifeline ensures the safety of your crew in emergency situations.

Key Specifications:

- **Non-Kinking Design:** The lifeline boasts a non-kinking feature, ensuring smooth and tangle-free deployment in critical moments.
- **Optimal Diameter:** With a diameter of 8mm, this lifeline strikes the perfect balance between strength and manageability, meeting regulatory requirements.
- **High Breaking Strength:** Built with a breaking strength of not less than 5 kN, our lifeline guarantees robust performance, providing a secure connection to lifebuoys in emergency situations.
- **Generous Length:** The 30-meter length of the lifeline allows for versatile use, offering ample reach for various small vessel configurations and emergency scenarios.

Application:

The 8mm Buoyant Lifeline is specifically designed to be attached to small vessel lifebuoys, aligning with regulatory standards for maritime safety. Its buoyant nature ensures that it remains afloat and easily retrievable when needed the most.

Ideal for:

- Small vessels
- Boats
- Watercraft with lifebuoy requirements

Enhance Safety, Ensure Compliance:

Trust in the reliability of our 8mm Buoyant Lifeline to meet and exceed safety regulations. With its non-kinking design, optimal diameter, high breaking strength, and generous length, this lifeline is your dependable companion for maritime safety, providing peace of mind when it matters most.
