

X-904

X-904: Breakthrough in Design

Welcome to the future of personnel transfer devices with the X-904. Designed for quick and effective transportation of 4 to 12 personnel on and off platforms, the X-904 represents a paradigm shift in safety, efficiency, and user experience.

Safety Without Confinement:

Safety is paramount. That's why the X-904 is equipped with quick-release safety lanyards, providing riders with confidence and security without the feeling of confinement. We understand that you don't want to be strapped in, and we've listened to your needs.

Strong yet Lightweight

Crafted from a sturdy and durable aluminum skeleton, the X-904 ensures robustness without unnecessary weight. This design choice not only protects passengers from falling objects but also ensures ease of handling and maneuverability.

Safety Comes First

The X-904 exceeds standard safety regulations to provide an unparalleled level of protection for passengers. Designed with input from industry experts, including HSE&Q managers, crane operators, rig managers, and offshore personnel, this transfer device represents the culmination of two years of collaboration and innovation.

Features Designed for Efficiency

Every aspect of the X-904 is meticulously engineered for efficiency and convenience. Stainless steel ropes provide protection from side impacts, while shock-absorbing "feet" cushion passengers during landings. Additionally, designated areas for luggage ensure a clutter-free transfer experience.

Emergency Preparedness

In the event of an emergency, the X-904 is equipped to handle any

situation. Models accommodating 4, 6, and 8 passengers can accommodate stretchers, ensuring swift evacuation and medical attention if needed.

Join the Standard for Offshore Transfer

Experience the difference with the X-904 transfer device from the Billy Pugh Company. Trusted by industry professionals worldwide, it sets the standard for safety, efficiency, and reliability in offshore personnel transfer. Contact us today to learn more about how the X-904 can enhance your operations.

| PRODUCT | DESCRIPTION | DIMENSIONS | Weight |
|---|--------------------------|-------------------|---------|
| X-904-4 | | | |
|  | 4 Person Transfer Device | 86" x 86" x 35" | 600 lbs |
| X-904-6 | | | |
|  | 6 Person Transfer Device | 101" x 101" x 35" | 650 lbs |
| X-904-8 | | | |
|  | 8 Person Transfer Device | 101" x 101" x 35" | 650 lbs |

| PRODUCT | DESCRIPTION | DIMENSIONS | Weight |
|--|---------------------------|-------------------|---------|
| X-904-10 | | | |
|  | 10 Person Transfer Device | 112" x 112" x 36" | 900 lbs |
| X-904-12 | | | |
|  | 12 Person Transfer Device | 120" x 120" x 36" | 950 lbs |
