

Rigid Tag Line

Rigid Tag Line: Enhancing Safety and Efficiency

In the realm of personnel transfers and lifting operations, precision is key. Billy Pugh Co. offers taglines meticulously designed to streamline load guidance both on and offshore, ensuring optimal landing points with ease.

Standard ropes pose significant risks, with liabilities and injuries looming due to potential wrapping or catching hazards. Enter Billy Pugh Co.'s taglines, crafted from polydacron rope and coated in liquid polyurethane for unparalleled durability. This unique construction minimizes the likelihood of wrapping incidents and eliminates knots or raised areas prone to catching, thus bolstering safety across lifting programs.

Moreover, these taglines boast resistance to UV deterioration, thanks to their urethane coatings, ensuring prolonged reliability in various conditions.

For hands-off working environments, our Push/Pull Tag Line features a 4 ft. rigid section, offering the flexibility to position loads while adhering to strict safety protocols.
