

Electrical Escape Signs

Electric Escape Signs for Maritime Safety

These signs are essential for ensuring the safety of crew members and passengers during maritime emergencies. Read on to learn more about their importance and our offerings.

What are Electrical Escape Signs?

Electrical escape signs are illuminating signs specifically designed for maritime use. They serve the critical purpose of indicating emergency escape routes, emergency exits, and assembly points on ships and vessels. Equipped with internal lighting sources, such as LEDs, these

signs ensure visibility even in low-light or dark conditions at sea.

Importance in Maritime Emergencies

During emergencies like fires or power outages at sea, electrical escape signs play a crucial role. They guide crew members and passengers to safety by directing them to the nearest and safest exit routes on the ship. Compliance with safety regulations mandates the integration of these signs into the ship's emergency evacuation plans, thereby enhancing the overall safety of everyone onboard.

Key Features:

- **Premium Quality Design:** Our LED Escape signs are crafted with precision to meet the highest standards of quality and durability.
- **Easy Installation:** Designed for hassle-free installation, our signs ensure convenience without compromising on effectiveness.
- **Versatile Applications:** Suitable for use onboard cruise ships, ferries, offshore installations, and commercial ships, our range caters to diverse maritime needs.
- **Compliance:** All our signs comply with EU standards and hold Wheelmark approval. Additionally, they adhere to international safety standards set by the International Maritime Organization (IMO) for Safety Life at Sea.

Tailored Solutions:

- **Passenger Vessels:** Our premium LED Escape signs are ideal for passenger vessels, offering both safety and aesthetics.
- **Cargo Ships:** For cargo ships and other non-passenger vessels, we provide simpler designs that prioritize functionality without compromising on safety.

Complementary Products

In addition to our LED escape signs, we also offer a range of complementary products to further enhance maritime safety:

- **Non-Electrical Escape Signs:** From SafeSign, we provide non-electrical escape signs that ensure high visibility even when electricity onboard fails.
- **Low Location Lighting:** Essential for ships and vessels, low location lighting systems provide reliable guidance during emergencies, complementing our electrical escape signs.

Ensure the safety of your ship or vessel with our premium Electrical Escape Signs. For inquiries, customization options, or to place an

order, please contact us today.
