

Hammar LAD Light System Complete Kit, Plug & Play

HM-0461-L

In general, vessels such as Pilot Vessels, Fishing Boats and Work Boats have a tendency to capsize rather than sink vertically like SOLAS-size ships. When a vessel capsizes, LSA might not be released as intended until the vessel is upside-down, increasing the risk of entanglement in the vessel's superstructure.

The List-Angle Detection (LAD) Control Unit can activate an ERU at a predefined list angle or by the push of a button. The HM-0461-L is a complete kit for installation with an automatic activation list of 80 deg.

24V emergency power.

IP66 class. If mounted outside of bridge or wheel-house the release switch shall be mounted in a weather-protected enclosure with minimum IP67.

FEATURES:

- Approvals: H20 according to SOLAS

- **Product Specification: Complete Kit, Plug and Play**
- **Outputs: 1**
- **Release Depth: 1.5-4m and Automatic at List Angle**

INCLUDES:

- **Control Unit - LAD**
- **10m Cable (Marine Grade Shielded Type, 2 x 75mm²)**
- **Connector Box**
- **H20 ERU - HM-0414**
