

rescueMe PLB1

World's Smallest Personal Locator Beacon (PLB)

The **rescueME PLB1** is the world's smallest **marine personal locator beacon**, providing peace of mind wherever your adventure takes you. Compact, waterproof, and easy to use — it connects you instantly to global rescue services with no subscription fees.

Key Features

- **30% smaller** than standard PLBs – easily attaches to your lifejacket*
- **Retractable antenna** for streamlined storage
- **7-year battery life** for long-term dependability

- **24+ hour operational life** when activated
 - **High-brightness strobe light** (>1 candela) for nighttime visibility
 - **66-channel GPS receiver** for fast, accurate location
 - **Unique mounting clip** for secure placement
 - **Free-to-use global rescue service** (Cospas-Sarsat network) – **no subscriptions, no fees**
-

How It Works

When activated, the rescueME PLB1 transmits your **GPS position and ID** via the **Cospas-Sarsat** satellite network — the world's only government-funded search and rescue system. The nearest **Rescue Coordination Center** is alerted and updated with your location until help arrives.

Easy Operation

- One-handed activation, even in tough conditions
 - Spring-loaded flap prevents accidental triggering
 - Waterproof, rugged design built for marine use
-

Optional Accessories

- **Flotation pouch** available separately (keeps the PLB buoyant;

secure with included lanyard)

Technical Specifications

- Size: 77mm x 51mm x 32.5mm
- Weight: 116g
- Battery Life: 7 years
- Operating Life: 24+ hours
- Satellite System: Cospas-Sarsat 406 MHz
- GPS Receiver: 66-channel
- Waterproof: Yes (submersible)
