

Plastimo Transocean OSR ISO 9650-1 Liferaft, 6-Person, >24H, Container

Offshore Racing Liferaft | ISAF Standard for Extreme Conditions

Designed for offshore and blue water racing, this liferaft is developed from the ISAF standard to ensure maximum safety in extreme conditions. It features a -15°C inflation temperature, double insulating floor, and a highly visible fluorescent orange canopy with an automatically erecting arch tube. Equipped with a 4.3 cd external light, retro-reflective stripes, large ballast pockets, and high-capacity drogue anchors, this liferaft provides enhanced stability and visibility.

For easy boarding, it includes a boarding ramp with an internal grab handle, allowing individuals to pull themselves up and enter the raft smoothly.

Standard vs. Emergency Survival Packs

Two survival equipment packs are available, depending on the expected rescue time:

- **Standard Pack (Rescue within 24 Hours):** Includes essential

visibility and safety equipment, including some pyrotechnics.

- **Emergency Pack (Rescue Beyond 24 Hours):** Adds extra survival provisions such as food and water rations, additional hand flares, a torch, and SOLAS thermal protective aids.

A grab bag can also be included for additional preparedness. **Before a race, we recommend checking with organizers to confirm the required grab bag contents.**

Technical characteristics

Length: 80 cm

Height: 33 cm

Width: 50 cm

Model: Transocean OSR+, complete: > 24 h

Number of People: 6

Weight: 53 kg

Navigation Area: hauturier
