

NON TSO 9 Person Liferaft

The AVI Survival Products 9-person liferaft is one of the most compact and lightweight options available in their range. As a NON-TSO model, it's well-suited for those flying under Part 91 regulations and ideal for recreational boaters seeking reliable emergency protection at sea.

Built with advanced urethane-coated nylon fabric, the liferaft features a single-tube inflatable design that is heat-welded for a strong, seamless seal. Standard equipment includes a water ballast system for stability, hand pump, bailing bucket, sea anchor, exterior life-lines for support in the water, and a secure inflation/retaining line to prevent the raft from drifting. The CO₂ inflation cylinder is made of aluminum to resist corrosion in storage and use. The raft is stored in a rugged orange soft-pack valise made of tough polyester with Velcro closures for a compact, secure fit.

Its lightweight build and compact size make it easy to stow in tight aircraft compartments or on board vessels. Each liferaft is backed by a 5-year warranty on parts and labor, offering long-term dependability with proper care.

Product Features

- Lightest and smallest package on the market today, designed for private pilots and pleasure boaters.

- Comprised of buoyancy tube, deck, life lines, CO2 inflation system, boarding handles, retaining line, hand pump, bailing bucket, sea anchor, and valise.
- Lightest weight and most compact - easy to carry, stow away, and maneuver in any emergency situation.
- Soft-pack valise made of practically indestructible nylon with secure Velcro closures.
- Constructed of heavy-duty FAA approved neoprene coated nylon fabric.
- Optional highly visible orange canopy to aid in search and rescue operations.
- Contains aluminum cylinders and valves eliminating corrosion and greatly reducing the weight.
- High-tech CO2 automatic inflation system.
- Optional survival kits are available to meet individual requirements.
- 5-year warranty on parts and labor, built to last a lifetime with proper care.
