

Narwhal SV 480 Rescue Boat

The unsinkable rescue vessels **NARWHAL SV-480** complies with **Transport Canada** and **SOLAS** regulations, as well as Directive 96/98 / EC, as amended by Directive 2002/75 / EC, on marine equipment (**MED**).

As their main mission, these vessels have been designed for the recovery of crew members who fall into the sea, based on their ease of maneuvering and their rapid set-up. It is equally useful for an eventual abandonment or displacement of the ship and is also used to group, tow and organize life rafts.

The boat's towing capacity reaches 400 Kg. With its maximum motorization, allowing the dragging of life rafts with ease.
