

Comet Hand Flare, Red TC/SOLAS

Key Features:

- **Compact Design:** The Red Handflare boasts a unique and compact telescopic handle, ensuring easy extension for safe operation while saving valuable space when stowed in liferafts.
- **Safety Certification:** SOLAS (Safety of Life at Sea) and Transport Canada have approved this product, attesting to its reliability and compliance with stringent safety standards.

Versatile and Convenient:

- **Telescopic Handle:** The telescopic handle design facilitates effortless extension, allowing for safe and efficient use during emergency situations at sea.
- **Space-Saving Stowage:** When not in use, the Red Handflare neatly stows in liferafts, optimizing space without compromising its readiness for deployment.

Certified Safety:

- **SOLAS Approval:** The Red Handflare is approved under SOLAS regulations, ensuring that it meets the highest international safety standards for maritime distress signaling.
- **Transport Canada Recognition:** Additionally, Transport Canada has approved this product, reinforcing its credibility and reliability in critical situations.

Ensure Safety at Sea:

Choose the Red Handflare for a reliable and compact distress signaling solution. With its telescopic handle and SOLAS / Transport Canada approvals, this product is designed to provide a high level of safety and convenience during emergency situations at sea. Trust in its unique design and certifications to enhance your maritime safety measures.
