

Pains Wessex Parachute Rocket, Red TC/SOLAS

Elevate Your Safety at Sea:

- **SOLAS / Transport Canada Approved:** Our Parachute Rocket Red is a certified product, meeting the stringent safety standards of SOLAS (Safety of Life at Sea) and Transport Canada.
- **Long-Range Distress Signaling:** Engineered for day and night emergencies, this rocket ensures effective distress signaling with its red flare attached to a parachute, reaching an impressive altitude of 300m.
- **Robust Design, Resilient Performance:** Designed to withstand challenging environmental conditions, the Parachute Rocket Red delivers reliable performance even after immersion in water.

Key Features:

- **Enhanced Grip:** The rocket is equipped with an enhanced grip for effortless handling during emergency situations.
- **Extended Burn Time:** Burn brightly for 40 seconds, providing a prolonged and visible distress signal for effective communication.

Versatility and Compliance:

- **Professional and Leisure Use:** Trusted by both professional mariners and leisure craft enthusiasts, our Parachute Rocket Red is versatile and reliable.
- **Regulatory Compliance:** Complies with SOLAS 74/88 regulations, mandating the presence of 12 rockets on the Ship's Bridge and 4 rockets in liferafts and lifeboats.

Invest in Your Safety:

Choose the Parachute Rocket Red for a distress signaling solution that exceeds expectations. With SOLAS and Transport Canada approvals, this product is your reliable companion for maritime safety, ensuring peace of mind in any situation.
