

Pains Wessex Man Overboard Light and Smoke Mk9, TC SOLAS

Key Features:

- **SOLAS / Transport Canada Approved:** The Pains Wessex Manoverboard MK9 is certified by SOLAS (Safety of Life at Sea) and Transport Canada, meeting rigorous safety standards.
- **Compact Lifebuoy Marker:** Designed to be mounted on a ship's bridge wing, attached to a 4 kg lifebuoy for quick and efficient deployment.
- **Automatic or Manual Deployment:** The Manoverboard MK9 can be deployed either automatically or manually, ensuring flexibility and rapid response in man overboard situations.
- **Self-Activated LED Lighting:** Features a self-activated LED lighting system exceeding SOLAS requirements, providing 2 candela light output and lasting for 2 hours, enhancing visibility day or night.
- **Dense Orange Smoke:** Provides 15 minutes of dense orange smoke, offering additional visibility and aiding in locating the person in the water.

Safety Requirements:

- **Dual Marker Installation:** Ships are required to fit at least two Manoverboard MK9 markers, ensuring comprehensive coverage and compliance with safety regulations.

Enhance Man Overboard Safety:

Choose the Pains Wessex Manoverboard MK9 for a reliable and efficient lifebuoy marker. With SOLAS and Transport Canada approvals, this compact marker enhances visibility, providing crucial assistance in man overboard situations. Trust in its advanced features and regulatory compliance for a safer maritime environment.
