

L90 LED Lifebuoy Light

Explore the Daniamant L90 LED Lifebuoy Light, designed to exceed marine safety standards.

The Latest L90 LED from Daniamant replaces the popular L90 with updated LED technology. This new version uses modern technology making it safer for the environment, especially during disposal. The L90 LED meets all the latest legislation whilst retaining the previous popular form, so no new brackets or fixings are required to replace the older models installed on vessels.

Key Features:

- Exceeds the IMO SOLAS regulations
- Min. Standard: 2cd output
- Min. Standard: 2 hour duration
- Robust and reliable

**** Please note when removing the insulating tab from the battery version, the tab maybe between the batteries and not visible when initially opening the unit by unscrewing the top dome.**
