

M-20.2 EEBD

Escape with Confidence

The M-20.2 Emergency Escape Breathing Device (EEBD) is your reliable self-contained breathing apparatus, designed for quick and efficient use during emergency situations. This closed-circuit system ensures the safety of users in toxic or oxygen-deficient atmospheres.

Key Features:

- **Automatic Activation:** Compressed oxygen activates on device removal.
- **Demand Regulator:** Provides immediate inhalation, up to 100 liters during high work rates.
- **Clear Case:** Quick visual checks for operational readiness.
- **Versatile Usage:** Belt-worn or stored for diverse market needs.

Performance:

- **Duration:** NIOSH 10 mins, CE Marked 15 mins.
- **Service Life:** 15 years.
- **Temperature Range:** 10–149°F.
- **Inspection:** Visual, annual for stored units, daily for deployed.

- **Approvals:** MED Wheelmark, CE/EN13794, NIOSH.

Dimensions & Weight:

- **Product:** 2.75" x 7" x 6.1", 2.1 lbs.
- **Storage Case:** 8.2" x 9.2" x 4.2".
