

Fire Bucket

Experience the best in fire safety with our modernized Fire Bucket. Combining traditional design with contemporary enhancements, this essential tool provides improved handling and control for fire extinguishing.

Key Features:

- **Dual Handles for Enhanced Control:** We've modernized the classic design with handles at both the top and bottom. This makes it easier to handle during use and provides better control when throwing water or sand on the fire.
- **Generous 10 Litre Capacity:** With its 10-litre capacity, you have ample resources to tackle fires effectively.
- **Bilingual for Regulatory Compliance:** Screen-printed labels in both English and French ensure compliance with regulations and quick identification.

- **Built to Last:** Our Fire Bucket features sturdy metal construction, coated inside and out for corrosion protection, ensuring durability and longevity.
- **Rounded Bottom for Easy Handling:** The rounded bottom facilitates easy filling and precise control when pouring water onto the fire.
- **High Visibility Red Color:** The vivid red color allows for quick and easy identification in emergency situations.
- **Folding Bail Handle on Top:** The top handle is designed for easy transport and maneuverability.
- **Control-Grip Handle on Bottom:** The bottom handle provides enhanced control during the firefighting process.

Elevate your fire safety measures with our modernized Fire Bucket. It's a reliable tool that combines tradition with innovation, offering you better handling, compliance, and control during fire emergencies. Trust in this essential equipment to safeguard your surroundings.
