

Comet Linethrower 250

Marine Line-Throwing Appliance: Precision in Rescue Operations

Introducing Comet's self-contained line-throwing appliance, a vital tool designed for maritime safety and compliance with SOLAS regulations. This device ensures swift and accurate line deployment, essential for emergency rescue scenarios.

Key Features:

- **Comprehensive Design:** Housed in a weatherproof plastic casing with an end cap, the line-throwing appliance features a reliable twist-grip trigger assembly, rocket, and line – all compactly integrated for ease of use.
- **SOLAS Compliance:** To meet SOLAS requirements, it is recommended to carry four complete rocket and line assemblies on board, ensuring readiness for emergency situations.
- **Impressive Throwing Range:** With a throwing range between 230m and 250m, this appliance provides an extensive reach, enhancing its effectiveness in rescue operations.
- **Solid Propellant Reliability:** The use of solid propellant

guarantees a highly accurate flight path, ensuring precision even in challenging conditions with strong sidewinds.

Versatile and Dependable:

- **Emergency Preparedness:** Essential for quick and effective response in emergency situations at sea.
- **User-Friendly:** The twist-grip trigger assembly ensures easy and intuitive operation, allowing for rapid deployment when needed.
- **Accurate Flight Path:** Solid propellant technology ensures a reliable and accurate trajectory, crucial for precise line deployment.
