

PLT® Mini Rescue Pack

The PLT® Mini Rescue Pack is designed for rescue organizations, equipping them with essential tools for effective and precise rescue operations. This comprehensive pack includes two types of projectiles with impressive reach, CO2 cartridges for propulsion, lineboxes, light sticks, and a dedicated storage container.

Key Features:

- **Dual Projectiles:** The pack features two types of projectiles – the Mini-Rescue 100 with a reach of 100 meters and the Mini-Rubber with a reach of 90 meters, providing versatile options for various rescue scenarios.
- **CO2 Propulsion:** With a capacity to hold 20 CO2 cartridges, the pack ensures a reliable and powerful launch for the projectiles, facilitating swift and efficient rescue efforts.
- **Lineboxes and Light Sticks:** The inclusion of lineboxes and light sticks enhances the versatility of the pack, providing additional tools for varied rescue situations.
- **Storage Container:** A dedicated storage container ensures organized and secure housing for all components, facilitating quick access during emergencies.

Launch Distance with 3.2mm Line:

- **Mini-Rescue 100:** Reaches an impressive distance of 100 meters.
- **Mini-Rubber:** Covers a substantial range of 90 meters.

High Breaking Strength:

- The projectiles boast a breaking strength of 1580N (161kg), ensuring robust and dependable performance in critical situations.

The PLT® Mini Rescue Pack stands as a reliable and versatile solution, empowering rescue organizations with the tools needed for precision and efficiency in a variety of rescue scenarios.
