

Pains Wessex Hand Flare, Red

Key Features:

- **SOLAS / Transport Canada Approved:** The Red Handflare MK8 is certified by SOLAS (Safety of Life at Sea) and Transport Canada, ensuring it meets rigorous safety standards.
- **Short-Range Distress Signal:** Designed as a hand-held distress signal for short-range use, providing a reliable means to pinpoint location day or night.
- **60-Second Burn Time:** Burns intensely for 60 seconds at an impressive 15,000 candela, enhancing visibility during distress situations.
- **Telescopic Handle:** The unique telescopic handle design allows for easy extension, making it compact and space-saving when stowed in a liferaft.
- **User-Friendly Operation:** Features a pull wire mechanism for easy extension, ensuring quick and efficient use during emergencies.
- **Day and Night Use:** Ideal for both day and night distress signaling, providing a visible and effective means to communicate your location.

Invest in Reliable Safety:

Choose the Red Handflare MK8 for a dependable distress signaling solution. With SOLAS and Transport Canada approvals, this hand-held flare is engineered for short-range use, ensuring visibility and safety during emergency situations at sea. Trust in its user-friendly design and certification for a reliable response when it matters most.
