

Comet Man Overboard Light & Smoke Signal TC SOLAS

Ensure the utmost safety at sea with our SOLAS/Transport Canada Approved Light & Smoke Signal. This indispensable marker, compliant with SOLAS regulations, is designed to signal the location of a man overboard both day and night.

Key Features:

- **SOLAS/Transport Canada Approved:** Our product meets the stringent safety standards set by SOLAS and Transport Canada, guaranteeing reliability and compliance with maritime regulations.
- **Versatile Mounting:** Mounted in its steel bracket on each bridge wing and attached to a 4kg lifebuoy, this signal can be positioned up to 56m above sea level, exceeding the SOLAS-required minimum of 30m.
- **Dual Signaling Mechanism:**
 - *Dense Orange Smoke:* The signal produces dense orange smoke for a duration of 15 minutes, providing a clear and visible indication of distress.
 - *Dual LED Lights:* Two high-intensity LED lights burn at 2 candela for a minimum of 2 hours, ensuring visibility during nighttime emergencies.

Application:

- **Man Overboard Situations:** The Light & Smoke Signal is specifically crafted to promptly and effectively communicate the location of a man overboard, enhancing search and rescue operations.

Compliance and Peace of Mind:

Adhering to SOLAS regulations, our Light & Smoke Signal not only meets but exceeds the required specifications. With its dual signaling mechanism and versatile mounting options, this product is your trusted ally for maritime safety, providing peace of mind in emergency situations.
