

NorMar Offshore Skimmers

NorMar Offshore Skimmers 100-350 m³/h

NorMar Offshore Skimmer Series The NorMar Offshore Skimmer Series is designed and built with a focus on cost-effective oil recovery. The oil recovery system is able to recover all types of viscosities in all weather conditions where oil is on the surface. For personnel safety reasons, the system can be remotely operated (optional) to avoid having people on deck during operation. The system is designed to require minimum maintenance performed by local mechanics.
