

FitzWright Davit Launch Liferaft 12 Person TC/SOLAS

Product Overview:

The FitzWright Davit Launch Liferaft is specially designed to facilitate dry-shod evacuation from embarkation heights that are typically too high for standard throw-overboard liferaft deployment. Proudly assembled in Canada, this liferaft is suitable for use on all types of vessels equipped with davit launch systems.

Key Features:

- **Davit Launch Compatibility:** Specifically designed for use with davit launch systems, ensuring safe and efficient deployment.
- **Round GRP Protective Container:** The liferaft is housed in a round, durable container made from rubber composite material. It features an easy access Davit Hook Port for quick and secure attachment.
- **Transport Canada & SOLAS Approved:** This liferaft is fully approved by Transport Canada and complies with SOLAS regulations, ensuring its reliability and safety.
- **High Visibility Canopy:** Equipped with a high-visibility canopy featuring SOLAS reflective tape, enhancing visibility and safety.

during rescue operations.

Specifications:

- **Capacity:** This liferaft is designed to accommodate up to 12 persons.
- **Weight:** The liferaft has a weight of 142 kg, ensuring it is manageable for davit launch and deployment.

Ensure the safety of your crew and passengers during emergencies with the FitzWright Davit Launch Liferaft. Designed for use in situations where standard throw-overboard liferafts are not suitable, this liferaft offers a reliable and approved solution for vessels equipped with davit launch systems.
