

FitzWright Davit Launch Liferaft 16 Person TC/SOLAS

Product Overview:

The FitzWright Davit Launch Liferaft is meticulously designed to accommodate dry-shod evacuation from embarkation heights that are typically too high for standard throw-overboard liferaft deployment. Proudly assembled in Canada, this liferaft is engineered to be used on all types of vessels equipped with davit launch systems.

Key Features:

- **Davit Launch Compatibility:** Tailored for davit launch systems, ensuring a safe and efficient deployment method in challenging situations.
- **Round GRP Protective Container:** Housed in a round, robust container constructed from durable rubber composite material. The easy access Davit Hook Port allows for quick and secure attachment.
- **Durable Construction:** Crafted from sturdy materials to withstand the rigors of maritime environments, ensuring the safety of your crew and passengers.
- **Transport Canada & SOLAS Approved:** This liferaft carries the

official approval of Transport Canada and complies with SOLAS regulations, meeting the highest safety standards.

- **High Visibility Canopy:** Equipped with a high-visibility canopy featuring SOLAS reflective tape, enhancing visibility and safety during rescue operations.

Specifications:

- **Capacity:** This liferaft is designed to accommodate up to 16 persons, making it suitable for larger crews and vessels.
- **Weight:** The liferaft has a weight of 180 kg, ensuring it can be managed effectively during deployment.

Ensure the safety of your crew and passengers during emergencies with the FitzWright Davit Launch Liferaft. Designed for use in situations where standard throw-overboard liferafts are not suitable, this liferaft offers a reliable and approved solution for vessels equipped with davit launch systems.
