

Double Bitt Bollard

Double Bitt bollard is a direct improvisation of Single Bitt type bollard offering comfort of multiple mooring line secured without compromising the mooring line of neighboring vessel. Due to its design with slop at an angle, it very well facilitates spring line of the ship. TEKMARINE provides complete range of Double Bitt bollards.

TEKMARINE offers all popular types of Double Bitt type bollards, including many custom design and legacy design to replace the existing bollards on like by like basis with same bolt pattern.

Standard size ranges from smallest capacity of 10t to 200t, however larger sizes available upon request upto 400t.
