

MicroSpike® Jacket HD 8180

Product Overview:

Fortified Polyolefin Alloy technology. The process of fortifying a geomembrane requires that a geomembrane be manufactured with special prime grade resins blended with a highly stabilized and advance UV antioxidant formulation. This provides the jacket with superior physical, mechanical, and endurance properties.

NEW FEATURE:

MICROSPIKE® JACKET HD 8180 HAS A ONE SIDE SMOOTH AND THE OTHER SIDE SURFACE FINISH WITH A MICROSPIKE ® TECHNOLOGY WHICH PROVIDES EXCELLENT GRIP AND ADHESION TO THE TAPE SURFACE.
