

# Megator Alpha Oil Skimmer

---

The Megator Alpha Skimmer is one of the most versatile weir skimmers available. Made entirely from tough, corrosion resistant stainless steel, the Alpha Skimmer can deal with a variety of aggressive liquids at varying depths and concentrations.

- **Lightweight design** – Easy one man operation
- **Adjustable intake weir** – Enabling the height of the intake weir to be set for optimum efficiency
- **Tri-float design** – Provides exceptional stability
- **Comprehensive range** – Available in four sizes
- **Shallow draft** – Can operate in 12" (30cm) water depth
- Used in conjunction with a [self priming pump](#) or gravity feed application
- Supplied with 10 ft of suction hose

## Options

- **Debris screen kit** – Prevents floating debris blocking and choking the skimmer suction.
- **Detachable floats** – Allows the skimmer to be dis-assembled for transport and storage or to allow access in confined spaces.
- **Folding skimmer** – Allows the skimmer to be lowered through a manway, self deploying on contact with water.
- **Guide rails** – Secures the skimmer in the desired area, yet allows it to rise and fall with the water level.
- **Telescopic weir adjustment handle** – Raise and lower the skimmer to in-accessible areas and adjust the weir height to the desired level.
