

Megator Alpha Oil Skimmer

The Megator Alpha Skimmer is one of the most versatile weir skimmers available. Made entirely from tough, corrosion resistant stainless steel, the Alpha Skimmer can deal with a variety of aggressive liquids at varying depths and concentrations.

- **Lightweight design** – Easy one man operation
- **Adjustable intake weir** – Enabling the height of the intake weir to be set for optimum efficiency
- **Tri-float design** – Provides exceptional stability
- **Comprehensive range** – Available in four sizes
- **Shallow draft** – Can operate in 12" (30cm) water depth
- Used in conjunction with a [self priming pump](#) or gravity feed application
- Supplied with 10 ft of suction hose

Options

- **Debris screen kit** – Prevents floating debris blocking and choking the skimmer suction.
- **Detachable floats** – Allows the skimmer to be dis-assembled for transport and storage or to allow access in confined spaces.
- **Folding skimmer** – Allows the skimmer to be lowered through a manway, self deploying on contact with water.
- **Guide rails** – Secures the skimmer in the desired area, yet allows it to rise and fall with the water level.
- **Telescopic weir adjustment handle** – Raise and lower the skimmer to in-accessible areas and adjust the weir height to the desired level.
