

3" x 4' Oil Only Sorbent Sock

These socks are 4' (1.2 meters) in length and 3 inches (8 cm) in diameter.

The socks feature a tough spun-bond outer sleeve that has a durable heat sealed seam running its entire length. This tube is then filled chopped spunbond polypropylene core that is made from 100% Post Industrial material. This core will absorb just oil-based fluids. The absorbent core is secured into the sleeve at each end with a durable metal clip.

The spun-bond outer sleeve makes these socks very strong even when containing absorbed fluid, they are also a no-lint product. This mean they will not shed any loose fibres. The socks are very flexible which allows them to conveniently mould to any uneven surfaces.

Key Features

- Great wicking and performance for all of your petroleum-based leaks,drips and spills.
- Ideal for when your application requires greater flexibility and/or absorbency.

- Naturally repels water making them ideal for outdoor use.
- Socks mold around equipment and fit in hard to reach places.
