

15" x 150' Blue Oil Only Heavy Weight Rolls (2 per bag)

With a heavy fabric weight of 286 gsm, this Oil Only roll at 46 metres long offers our heaviest per square metre product.

This precision engineered construction features a very smooth, low-slip, high-wicking fine fibre spun-bond top and bottom surface either side of a high loft, fine fibre meltblown polypropylene core. This will very quickly absorb large oil spills with the excellent wicking attributes making it an ideal absorbent for recovering spills from hard to access locations.

The roll is 40 cm wide by 46 metres long and is perforated down its length, every 19 cm (7.5") and width every 150 cm (20"). The roll is supplied in a clear plastic bag.

Key Features

- The sorbent is made up of three layers sonically bonded together
- Top and bottom layers are made from micro fibres of densely woven polypropylene
- Core is made from a high loft polypropylene
- Low linting
- Fast wicking.

Size

37.5 cm x 46 m (15" x 150')

Suitable for

Recovering oil based fluids
