

Air Matrix Sorbent Pads

These pads have a fabric weight of 286 gsm with 100 pads in a bale, offering a premium sorbent with a heavier per square metre fabric.

Air Matrix™ represents ESP's premium Oil only synthetic sorbent technology. Made from 100% premium recycled polypropylene it offers customers a high-tech synthetic alternative to the discontinued Coldform2™ and traditional meltblown. Its unique features are exceptionally high water and chemical resistance and superior liquid retention when compared to other competitors' products. The high-quality recycled materials used combined with ESP's unique manufacturing process make this product a high capacity sorbent that is also very soft and drapable.

Each pad is 41 cm wide by 46 cm long. The pads are supplied in a clear plastic bag.

Size

41 cm x 46 cm (16" x 18")

Weight

This is the sorbents weight with heavy = 1, medium = 2, and single weight = 3
