

Universal 15"x18" Single-Ply Lightweight Sorbent Pads (200 per bag)

With a fabric weight of 165 gsm there are 200 pads in a bale, which is twice the number when compared to the heavier weight 286 gsm 100 pad count version, and as a results offers a lower cost per square metre product.

The pads are made from a single layer of meltblown which is sonically bonded together. The sonic bonding points makes the pad less prone to stray fibres becoming detached. This gives the pad a very even structure which also contributes to the pad's good absorbency rate. These attributes help make the pad an industry standard construction because it offers all-round average performance but excellent versatility. The grey colour helps to hide any absorbed liquids.

Each pad is 38 cm wide by 46 cm long and is made from a single layer of meltblown fibres with bond points. The pads are supplied a clear plastic bag.

Key Features

- The pad is made from a single layer of meltblown that is sonically

bonded together.

- Good value and reliable performance.
- Made from high quality polypropylene.

Size

38 cm x 46 cm (15" x 18")

Suitable for

Recovering both oil and water based fluids at the same time
