

15" x 18" Oil Only Single-Ply Lightweight Sorbent Pads (100 per pag)

The pads are made from a single layer of meltblown which is sonically bonded together. The sonic bonding points make the pad less prone to stray fibers becoming detached. This gives the pad a very even structure which also contributes to the pad's good absorbency rate. These attributes help make the pad an industry standard construction because it offers all- round average performance but excellent versatility.

Key Features

- The pad is made from a single layer of meltblown that is sonically bonded together.
- Dimpled surface reduces lint, increases strength and speeds absorption
- Good value and reliable performance
- Made from high quality polypropylene

Size

15" X 18"

Weight

This is the sorbents weight with heavy = 1, medium = 2, and single weight = 3

Suitable for

Recovering just oil only fluids

Recommended

- Recommended for recovering oil only fluids on large bodies of sea or fresh water
- Recommended for recovering both oil and water indoors
- We recommend this absorbent for recovering both oil and water outdoors
