

Hazmat 15"x18" Single-Ply Medium Weight Sorbent Pads (100 per bag)

At 240 gsm these pads are an economical alternative to the full heavy weight 286 gsm weight absorbent. There are 100 pads in a bale with each pad measuring 38 cm by 46 cm. The pads are made from a single layer of meltblown which is sonically bonded together. The sonic bonding points makes the pad less prone to stray fibres becoming detached. This gives the pad a very even structure which also contributes to the pad's good absorbency rate. These attributes help make the pad an industry standard construction because it offers all-round average performance but excellent versatility.

Each pad is 38 cm wide by 46 cm long and is made from a single layer of meltblown fibres with bond points. The pads are supplied in a clear plastic bag.

Key Features

- The pad is made from a single layer of meltblown that is sonically bonded together.
- Good value and reliable performance.

- Made from high quality polypropylene.

Size

38 cm x 46 cm (15" x 18")

Suitable for

For recovering unknown, aggressive or hazardous fluids

Recommended

We recommend this absorbent for recovering unknown or hazardous spills
