

SeaAir Barents 2

SeaAir Barents 2 is our most advanced helicopter passenger transit suit. The suit is a further development of SeaAir1, which was honoured the Award for Design Excellence by Norwegian Design Council when it was launched. The suit is developed for helicopter transport over cold waters and have 6 hours Solas-approval (in addition to ETSO-approval)

Prepared for optional integration av emergency breathing systems, HP ERBS/air pocket and SeaAir EBS with compressed air.
