

Switlik UA-80 Evolution - Constant-Wear Life Vest

Introducing the groundbreaking UA-80 Evolution Vest, the first commercially available underarm constant-wear life vest approved by the FAA. Designed by SWITLIK, a name synonymous with innovation and reliability in safety gear, this vest revolutionizes the concept of flotation devices for aircrew members.

Key Features:

1. **SWITLIK Signature Underarm Flotation:** Unlike traditional yoke-style bladders, the UA-80 Evolution utilizes SWITLIK's pioneering underarm flotation technology. This design enhances mobility, maneuverability, and water channeling, providing superior performance and auto-righting capabilities for unconscious aircrew.
2. **Maximized Space:** With the flotation integrated inside the vest, valuable front space becomes available for accessories. The UA-80 Evolution boasts more than double the MOLLE loops of previous Switlik designs, allowing for increased attachment options.
3. **Comfort and Ergonomics:** The vest features SWITLIK's X-Back ergonomic design, ensuring superior comfort, particularly in seated positions. Its breathable back panel with mesh spacer fabric reduces thermal burden while providing extra ventilation and padding.
4. **Redundant Safety Measures:** Equipped with a twin chamber inflatable cell with two oral tubes and a three-layer inflation chamber design, the UA-80 Evolution prioritizes redundancy for enhanced safety.

5. **QuickBurst® Breakaway Zipper:** Featuring a YKK® QuickBurst® Breakaway zipper design, the vest allows for swift deployment when needed.
6. **Durable Construction:** Crafted with protective 1000D Textured Nylon cover fabric, the UA-80 Evolution is built to withstand rigorous conditions, ensuring longevity and reliability.
7. **Additional Features:**
 - Storage pockets for excess back strap webbing
 - Heavy-duty COBRA® Quick Release Buckles for secure fastening
 - Built-in emergency locator light for increased visibility
 - Integrated grab handle to aid in rescue or life raft boarding

Specifications:

Weight:	3.62 lbs.
Buoyancy:	Over 80 lbs.
Inflation System:	Two (2) 38g CO2 Cylinders
Cover Fabric:	Urethane Coated 1000D Nylon
TSO Approval:	TSO-C13g

The Switlik UA-80 Evolution sets a new standard in constant-wear life vests, offering unmatched comfort, safety, and functionality for aircrew members. Experience the evolution in life-saving gear with SWITLIK.
