

Airborne Rescue Kits

Our Airborne Rescue Kits are designed to provide swift and effective rescue solutions in emergency situations. With advanced features including water activation, quick disconnect under load, and a floating line that is both glow-in-the-dark and reflective, this kit is tailored to meet your rescue needs with utmost reliability. Airborne Rescue Kits require a 2-Year Overhaul Service.

Key Features:

- **Water Activated:** The Airborne Rescue Kit is designed to activate upon contact with water, ensuring rapid deployment and immediate assistance in water-related emergencies.
- **Quick Disconnect Under Load:** Our kit is equipped with a quick disconnect mechanism that allows for seamless detachment even under load, facilitating swift and efficient rescue operations without compromising safety.
- **Floating Line - Glow in the Dark and Reflective:** The included floating line not only enhances visibility in low-light conditions

with its glow-in-the-dark feature but also ensures maximum visibility during daylight hours with its reflective properties. This feature enhances rescue coordination and increases the chances of successful retrieval.

Standard Kit Includes:

- Raft / Equipment Bag
- Large Carrying Bag
- Line Bag
- Quick Disconnects

Service Requirements:

- 2 Year Overhaul
