

Antisink Large Boats

Experience the future of maritime safety with Antisink's Large Boat safety system, a groundbreaking solution for boats.

The Antisink All-in-One system can be mounted inside your vessel, ready to activate automatically should water enter your boat.

Similar to the All-in-One solution for smaller vessels, Antisink's Large Boat system can be installed inside your vessel, ready to activate automatically should water enter your boat. This system features specially designed cassettes, housing buoyancy bags that are engineered to counter the forces of sinking.

The Large Boat system consists of a central bottle bank that the buoyancy bags and hoses connect to. There are two sizes available,

dependent on the buoyancy requirements of your boat. Customized solutions are also available for heavier boats.

Technical Specifications

Model No.	Boat Sizes	CO2 Unit Targets	Pouch Unit Targets
LB 20000 N	29-34 ft / 5000kg	620x180x160mm	580x185x75mm
LB 30000 N	34-40 ft / 8400kg	685x205x185mm	580x185x75mm

Key Features:

- Compact & easy to install
- Reusable & repackable
- Impact-resistant
- Waterproof
- Flame retardant
- All components are reusable or recyclable
