

Antisink Rescue Kit - Soft Bag

A Lightweight, Portable Solution Specifically Designed for Smaller Vessels

Experience the future of maritime safety with the Antisink Rescue Kit - Soft Bag, a groundbreaking solution for emergency services operating at sea.

The Antisink Rescue Kit is a lightweight, portable system designed for quick and effective rescue of sinking vessels. Packed in a durable soft bag, it is the idea solution for smaller vessels.

Key Features:

- Rescue Bag with CO2: Provides 550 kg lifting capacity, ensuring buoyancy when needed most
- Integrated CO2 Cylinder: Activates with a simple wire pull

- **Compact and Portable:** Weighing just 7.9 kg, it's easy to carry and store on smaller vessels
- **Durable Soft Bag:** Protects the equipment, keeping it ready for action

An Eco-Conscience Choice

The Antisink Heli Kit is not only a lifesaver, but also a budget-friendly, eco-conscious choice. All components, including bags and hoses are reusable, making it a sustainable and cost-effective solution for every emergency service.
