

Aircraft Survival Kits - Wilderness

Aircraft Survival Kits - Wilderness Area

These Aircraft Survival Kit (ASK) is designed to provide emergency equipment to aid in survival in the event of an unexpected remote Wilderness area landing.

The kits have been designed to comply with the CARs 602.61 for flights over land. This package has been adapted from established Survival Kit Standards and can also be tailored to an operators specific geographical requirements.

All kits provide a means of:

- **Starting fire**
- **Providing shelter**
- **Purifying water, and**
- **Signalling distress.**

Each standard kit also provides for personal protection, and general equipment required to make survival easier, more comfortable and reduce risk until help arrives.

Compliance:

- **In compliance with CARS 602.61**
