

Hammar H20 EPIRB Hydrostatic Release Unit

In times of emergency, every second counts. Ensure the safety of yourself and your crew with the Hammar EPIRB Hydrostatic Release Unit. Designed for reliability, this hydrostatic release unit is a crucial component that can make all the difference in rescue operations.

Key Features:

- **Automatic Activation:** Ensures swift EPIRB activation in emergencies.
- **Reliability Matters:** Most reliable hydrostatic release unit trusted by leading EPIRB manufacturers.
- **Industry Standard:** Widely used across the industry as the go-to hydrostatic release unit.
- **Facilitates Swift Rescue:** Increases the efficiency of rescue operations, enhancing life-saving possibilities.

Technical Specifications:

- **Material:** Durable and corrosion-resistant for longevity.
- **Compatibility:** Seamless integration with major EPIRB models.
- **Activation Depth:** Reliable activation at specified depths.
- **Easy Installation:** Simple process for new and existing EPIRB units.
